

READ ME FIRST

Please find here attached the MatLab files (example.m). We would ask you to open every one of them in your MatLab and run TSP.m file. We call dynamicProg.m and recursiveAlgo.m from TSP.m, which run Dynamic Programming and Recursive Approach algorithms respectively. All the other functions were used in the algorithms. Comments in the code indicate which piece of code does what. For running the code, don't forget to change the directory to be the current directory. The data about distances was retrieved from this website:

http://www.welcomearmenia.com/travel_to_armenia/distance_between_cities

Enjoy. :-)
